LETTER OF RECOMMENDATION
DANG CONG THANH
21080118

I am David Holloway, acting as the Programme Lead for Computer Games Design and Programming (CGDP) and Games Art programmes at British University Vietnam (BUV). I have known Mr Dang Cong Thanh for about three years and have been able to see him progress throughout his entire undergraduate degree here at BUV.

Thanh is a strong student who listens carefully and applies what he has learned creatively. He values innovation and is not afraid to experiment with new methods or create new forms of output, regardless of the outcome. He also has a keen eye for design.

He is a strong candidate for Games Design, and his projects produced during his time here have heavily focused on the design aspect of games. He has developed several well-designed projects and demonstrated the ability to generate unique and creative game concepts.

Thanh communicates effectively and works well with others. He is able to speak and write in an academic manner and present his ideas clearly. He has demonstrated the ability to take on both junior and senior roles within a team, performing well in each capacity.

Having studied Computer Games Design and Programming at BUV under University of Staffordshire standards, Thanh understands the quality expected of a UK education and has dedicated himself to meeting this high standard. He is always eager to ask questions and identify areas for improvement. He is receptive to constructive feedback and actively applies it to enhance his work.

I would highly recommend Thanh for your Master's programme and believe he would be a valuable addition. Please feel free to contact me if any further information would be helpful.

Yours sincerely,

David Holloway
